

B & M delivers 24/7 access to online services for European public body

B & M was asked to help a major European public body to ensure that its clients in Europe, along with its peer organisations around the world, could access its sophisticated transactional system 24/7 by defining an appropriate new architecture.

Project Objectives

- To ensure a robust architecture capable of delivering 24/7 access to online services
- To enable systems access for end users in Europe and worldwide
- To ensure that the customer's IT infrastructure is compatible with other organisations worldwide
- To ensure that the organisation could be a leading player in its sector worldwide.

Project Tasks

- To define a new architecture capable of supporting 24/7 access
- To manage the development of a test architecture
- To migrate a key application to the test architecture
- To ensure more flexibility in the traditional split between batch and online process management.

B & M Europe

B & M has specialised in delivering skilled ICT specialists to meet the needs of leading organisations throughout Europe since 1992. We focus exclusively on providing consultancy, technical services and support for z/OS, UNIX and Linux enterprise systems, including third-party systems software, open systems and networking connectivity. We add real value for HR and IT professionals by taking the time to understand their needs and applying best practice methods to deliver results.

Duration

The project is still running and is expected to take two years.

Results

- New architecture defined and documented
- Framework in place to enable customer to be a key global player in its sector
- Small-scale 24/7 architecture developed and tested
- Migration of key application defined and ready for testing.
